

## THE IGO STRIPING MACHINE WITH IMPACT XP PAINT

The **actual cost per field** of using the IGO PAINT STRIPING MACHINE AND IMPACT XP PAINT is **approximately \$26 – 27 per field**. When using a dilutable 5-gallon bulk paint, the actual cost per field is approximately \$38 per soccer field not including labor costs involved with the on-site mixing of traditional bulk paint. It takes far less Impact XP Paint to line a field.

The IGO Striper has a hopper in which you can slot three 5 Liter bags of Impact XP Paint. You can **restripe** up to 13 standard soccer fields, depending on which nozzle is selected, eliminating the need to stop and refill.

There is **no messy clean up**. No water to carry around for priming, and at the end of the job, no water for rinsing.

BASEBALL FIELDS –The IGO Striper and the Impact XP Paint applies

a really good line **stripe not only on the grass** but on the **red clay too**. Unlike

when using aerosol paint on the red clay, the IGO applies the Impact XP Paint without the blowing away the red clay. The Igo Paint Striper does not need the

high pressure because of the unique nozzles which deliver a very fine atomized mist. The highly concentrated XP Paint paint has much greater

coverage over the leaf and therefore looks brighter, sharper and crisper than any of the traditional clay based paints.

STRIPING TIME – you simply load the bags of Impact XP Paint, prime the pump with water and you are ready to start striping. If you want to have a Striper that saves time then this is definitely the one for you. Don't forget the IGO Machine/Striper and the Impact XP Paint is a fully integrated technology; both designed to work in tandem with each other.

STRIPE LASTING TIME – The special nozzles on the IGO Striper sprays a very fine atomized mist. This means The difference is clear to see. Having greater coverage also means that it last a lot longer too.

Impact XP Paint may be applied during a light rain. On a sunny day, it will be touch dry in about 2 minutes and does not wash off like a standard clay/water based paint. We cannot guarantee it, but usually the Impact XP Paint will last up to twice as long as a line striped by most other paint striping machines and paints. **CONTACT US FOR A DEMONSTRATION**
